

# CONTACT SERVICE COMPANY

**Dear colleagues,**

Contact Service Company is a scientific consulting organization. It has been working for 7 years on Domestic and International markets of rare organic chemistry. During this period we have accumulated considerable experience in business contacts with Western companies and collected detailed information on potential customers.

While maintaining close relations with hundreds of scientists, Contact Service Company deserved high reputation in CIS and abroad. If you would like to, you could make inquiries about CSC to your colleagues.

## **We offer an opportunity to take part in our programs:**

- Extraction and modification of advanced compounds from natural sources, fractionation of extracts from biologically active plants, microorganisms and tissues of animals.
- Custom tailored programs of single and double stage synthesis; reagents are available.
- Acquisition of rare organic compounds and organic compounds collections for our stock.
- Advanced compounds screening aimed at confirmation of previous results or assumptions of biological (pharmacological or agrochemical) activity of compounds under this program. The program is held in cooperation with a number of research labs in Russia, Germany and USA.
- Acquisition of compounds for organic synthesis.

Aimed at authors and customers rights protection, all programs are held in the frame of confidentiality agreement. Upon request they could be based on special agreements with researchers, labs and Research Institutes.
