---

Dear participant at the Symposium on Natural Products ,

It is a great pleasure for me to announce you a new company for the development, production and marketing of innovative synthons and reagents for organic chemistry.

This new company will focus especially on:

- selenium and tellurium compounds
- organotin compounds
- calixarenes
- acetals
- chiral compounds
- etc.....

I kindly invite you to collaborate with this new and ambitious company by proposing your products. Let **Eburon Organics** develop and market your research chemicals and let it be the link between the universities, academic institutes and the industry.

Do not hesitate to contact me with your proposal or your request for more information.

Looking forward to collaborate with you, I remain,

Sincerely yours,

Frans Meskens  
Paul Van Regenmortel  
Dr. M. Shastri
